FOREWORD

The tables in this publication are compiled wildfire statistics covering calendar year 1982 as reported to the Forest Service, U.S. Department of Agriculture, by its field offices, the State Forester, or a comparable State official of each of the 50 States, Guam, Puerto Rico, the Department of the Interior, and the Tennessee Valley Authority.

The statistics are for forest land and nonforested watershed lands in Federal ownership, and for State and privately owned lands included in the Rural Fire Prevention and Control Program as authorized by Section 7 of the Cooperative Forestry Assistance Act of 1978 (P.L. 95-313).

Statistical data for each State are shown separately and totals are given for geographical groups of States. These statistics are the most reliable information the wildland protection agencies could obtain.

Since no field organization is available in unprotected areas to report fires, statistics for such areas are merely the best estimates available.

Cooperation in forest fire protection began under the Weeks Law of March 1, 1911. This law authorized the Secretary of Agriculture to enter into agreements with the States "to cooperate in the organization and maintenance of a system of fire protection on any private or State forest lands...upon the watershed of a navigable river." Cooperating States had to provide by law for a system of fire protection to which the Federal government could contribute up to half the cost.

The Clarke-McNary Act of 1924 broadened and strengthened the provisions of the Weeks Law. Section 2 authorized extension of cooperative forest fire control to include "any timber of forest producing lands or watersheds from which water is secured for domestic use or irrigation within the cooperating State."

In 1978, the authority contained in Section 2 of the Clarke-McNary Act was combined with the authorities of other cooperative fire programs to become Section 7 of the Cooperative Forestry Assistance Act of 1978.

Under the Cooperative Forestry Assistance Act, the State forestry organizations carry out the fire protection program. The Forest Service gives support through financial and technical assistance, coordination, review, and audit. It also provides help in training, developing and procuring fire equipment and tools, radio communications, implementing knowledge gained in fire research, and directing the nationwide forest fire prevention program.

BASIC DEFINITIONS

WILDFIRE	Any fire that burns uncontrolled in vegetation or associated flammable material.
REPORTABLE FIRE	Any potentially destructive wildfire that requires suppression action to protect natural resources and their associated values.

LAND CLASSIFICATIONS

COMMERCIAL FOREST LAND	Forest land that produces, or is capable of producing, industrial wood crops and that is not withdrawn for timber use by statute or administrative regulation. This includes areas that can be managed to grow industrial wood crops and that generally produce more than 20 cubic feet per acre annual growth. The term "commercial forest land" refers to currently accessible and operable areas as well as prospectively accessible and operable areas.
NONCOMMERCIAL FOREST LAND	Unproductive forest land that cannot yield industrial wood crops because of adverse site conditions, and productive forest land withdrawn from commercial timber use through statute or administrative regulation.
NONFORESTED WATERSHED LAND	Land that has never supported forests, or formerly forested land, now developed for nonforest uses such as crops, improved pasture, residential areas, city parks, improved roads and adjoining rights-of-ways, powerline clearings, and certain areas of water classified as land by the Bureau of Census. Includes brush, chaparral, and grass-covered watershed of navigable streams or streams that are important water sources for domestic use or irrigation.

FIRE CAUSES

LIGHTNING	Self-explanatory.
CAMPFIRE	A wildfire resulting from a fire started for cooking, heating, or providing warmth.
SMOKING	Wildfires caused by matches, lighters, tobacco, or other smoking materials.
DEBRIS BURNING	A wildfire spreading from fires used to clear land; burn trash, range, stubble, meadow, rights-of-way, logging slash; or from other prescribed burning.
INCENDIARY	Wildfires willfully set by anyone to burn, or to spread to, vegetation or property not owned or controlled by him/her, without consent of the owner or his/her agent.
EQUIPMENT USE	Wildfires caused by any and all mechanical equipment other than railroad operations.
RAILROAD	Wildfires caused by all railroad operations including burning rights-of-way and ties.
CHILDREN	Wildfires started by children younger than 12 years old.
MISCELLANEOUS	Wildfires that cannot be properly classified under other general causes.

GEOGRAPHIC GROUPS OF STATES

Tables are arranged in the following geographic groups.

Pacific Northwest Region
